Masternode FAQ

- Why a own Masternode?
  - Support the network, growth decentralizsation
  - High APR > 77%
  - Not your Keys, not your Coins. Never give away your keys or Coins
  - No Impermanent Loss
  - Full Voting control
- Why mydeficha.in as a Service-Provider?
  - Dont need to manage your own VPS
  - Simple Setup in your own Wallet
  - High Availability of your Operator

Masternode FAQ

- How much does the service cost?

  - The Masternodeoperators are for free for all interested Masternodeowners.

- How is the service funded?

  - It is planned to cover the Masternodeservice through the Community Fund.

- Must i send some DFI to another Institution?

  - No, all DFI are everytime in your own wallet.

- How much DFI do i need for a Masternode?

  - You need 20.011 DFI, 20.000 as Collateral, 10 DFI for the createmasternode-Fee, 1 DFI for Transactionfees.

- Does my wallet have to be open all the time?

  - No, this is not necessary. The DeFi Wallet is only needed to create the masternode, when you want to resign it or when you want to send or sell your rewards.

Masternode FAQ

- Can you steal my Collateral?
  - No, we have no access to your wallet, you dont send something to us.
- Can you vote for me for the Proposals?
  - No, thats not possible, you must vote on your own with your Owneraddress in your Wallet. We can assist you to do this.
- Where do I receive my rewards?
  - You receive the Rewards to your Owneraddress in the Wallet.
- How often do I get Rewards?
  - The Averagetime of a Blockreward with 135 DFI is 3,4 days

Masternode FAQ

- How can I start to run my own Masternode?
  - Apply a Operatoraddress from mydeficha.in
    - Contact us on Telegram or
    - Fill out the form on mydeficha.in or
    - Visit Shop on defichain-explained.com
  - Setup your DeFi Wallet on Win or Mac
  - Create a Legacy Address for your Owneraddress
  - Open Commandline in the Wallet
    - createmasternode YOUROWNERADRESS OUROPERATORADDRESS
  - Finished, that's all.
    - Relax and enjoy.

Our Infrastructure, currently 16 Server in 4 Datacenters

Monitoring and Telegrambot

/help - Commands overview

/status - Returns the status of your registered masternodes

/getblockheight - Returns the actual blockheight of the poolservice

/lastblockreward - Returns the last Blockreward

/earnings - Shows actual APR, found blocks since creation and mean time between 2 found bLocks with your registered masternodes

/register <owner or operator or MNID> - Links a masternode to your telegram username

/unregister <owner or operator or MNID> - Unlinks a masternode to your telegram username

/getnewoperator <owneraddress> - Get a new operator address from the mydeficha.in Masternodeservice (Owneraddress is optional, if entered, the createmasternode command is prepared for you)

/getprivkey <operatoraddress> <signed message of owner address> - Get the private key of the operator node to run the node on your own server

/rewardalarm <ON/OFF> - Switch the automated message on if one of your masternodes gets a block

/getfaucet - You get 0.005 DFI to recharge your UTXO Balance or just to fill up your balance ;)
